

# Visit us safely and discreetly

Here we register your visit with

Authorities request / recommend registration of visitors' data allowing them to quickly interrupt chains of infections.

We have decided to do so using the application SocialPass because it is safe, efficient and protects the confidentiality of your data.

Your data will be stored on a secure cloud database, to which authorised personnel of health authorities only will have access, in case they need the data. After 14 days your data will be automatically deleted. We won't be in a position to use it.

Please download this free application from Apple, Android stores respectively. Take 30 seconds to enter the necessary data. Then show our personnel the QR Code generated on your phone. They will scan it and then you can enjoy your stay with us.

You will be able to use the code each time you go out, whether you visit us or other locations. You will just need one key.

This way you help health authorities and us in our efforts to contain the pandemic. At the same time they, you and we will save time.

We thank you very much.

Download the application
